I. Background

The Detailed Test Plan for the National Council Licensure Examination for Practical/Vocational Nurses (NCLEX-PN®) was developed by the National Council of State Boards of Nursing, Inc. (NCSBN®). The purpose of this document is to provide more detailed information about the content areas tested in the NCLEX-PN than is provided in the basic NCLEX-PN Test Plan.

This booklet contains:

- The 2017 NCLEX-PN® Test Plan;
- Information on testing requirements and sample examination questions (items);
- Item writing exercises;
- References; and
- Appendix.

About the NCLEX-PN® Test Plan (Section II)

The test plan is reviewed and approved by the NCLEX® Examination Committee (NEC) every three years. Multiple resources are used, including the recent practice analysis of licensed practical/vocational nurses (LPN/VN), and expert opinions of the NEC, NCSBN content staff and boards of nursing (NCSBN’s Member Boards) to ensure that the test plan is consistent with state nurse practice acts. Following the endorsement of proposed revisions by the NEC, the test plan document is presented for approval to the Delegate Assembly, which is the decision-making body of NCSBN.

About the NCLEX-PN® Detailed Test Plan (Section III)

The detailed test plan serves a variety of purposes. It is used to guide candidates preparing for the examination, to direct item writers in the development of items, and to facilitate the classification of examination items. This document offers a more thorough and comprehensive listing of content for each Client Needs category and subcategory outlined in the test plan. Sample items are provided at the end of each category, which are specific to the Client Needs category being reviewed in that section. There is an item writing guide along with sample case scenarios, which provide nurse educators with hands-on experience in writing NCLEX style test questions. The Candidate Version of the detailed test plan provides the same comprehensive listing of content and sample items for each Client Needs category and subcategory outlined in the test plan; however, it does not offer an item writing guide or section with case scenarios.

For up-to-date information on the NCLEX-PN®, visit the NCSBN website at www.ncsbn.org.
II. 2017 NCLEX-PN® Test Plan

Introduction
Entry into the practice of nursing is regulated by the licensing authorities within each of the NCSBN Member Board jurisdictions (state, commonwealth and territorial boards of nursing). To ensure public protection, each jurisdiction requires candidates for licensure to meet set requirements that include passing an examination that measures the competencies needed to perform safely and effectively as a newly licensed, entry-level practical/vocational nurse (LPN/VN). NCSBN develops a licensure examination, the National Council Licensure Examination for Practical/Vocational Nurses (NCLEX-PN®), which is used by member board jurisdictions to assist in making licensure decisions.

Several steps occur in the development of the NCLEX-PN Test Plan. The first step is conducting a practice analysis that is used to collect data on the current practice of entry-level LPN/VNs (Report of Findings from the 2015 LPN/VN Practice Analysis: Linking the NCLEX-PN® Examination to Practice, NCSBN, 2016). Twenty-four thousand newly licensed practical/vocational nurses are asked about the frequency and priority of performing nursing care activities. Nursing care activities are then analyzed in relation to the frequency of performance, impact on maintaining client safety and client care settings where the activities are performed. This analysis guides the development of a framework for entry-level nursing practice that incorporates specific client needs, as well as processes that are fundamental to the practice of nursing. The next step is the development of the NCLEX-PN Test Plan, which guides the selection of content and behaviors to be tested. Variations in jurisdiction laws and regulations are considered in the development of the test plan.

The NCLEX-PN Test Plan provides a concise summary of the content and scope of the licensure examination. It serves as a guide for examination development as well as candidate preparation. The NCLEX® examination assesses the knowledge, skills and abilities that are essential for the entry-level LPN/VN to use in order to meet the needs of clients requiring the promotion, maintenance or restoration of health. The following sections describe beliefs about people and nursing that are integral to the examination, cognitive abilities that will be tested in the examination, and specific components of the NCLEX-PN Test Plan.

Beliefs
Beliefs about people and nursing underlie the NCLEX-PN Test Plan. People are finite beings with varying capacities to function in society. They are unique individuals who have defined systems of daily living reflecting their values, cultures, motives and lifestyles. People have the right to make decisions regarding their health care needs and to participate in meeting those needs. The profession of nursing makes a unique contribution in helping clients (individuals, family or group, including significant others and population) achieve an optimal level of health in a variety of settings. For the purposes of the NCLEX, a client is defined as the individual, family or group, which includes significant others and population.

Nursing is both an art and a science, founded on a professional body of knowledge that integrates concepts from the liberal arts, and the biological, physical, psychological and social sciences. It is a learned profession based on an understanding of the human condition across the life span and the relationships of an individual with others and within the environment. Nursing is a dynamic, continually evolving discipline that employs critical thinking to integrate increasingly complex knowledge, skills, technologies, and client care activities into evidence-based nursing practice. The goal of nursing for client care is preventing illness; promoting comfort; protecting, promoting, and restoring health; and promoting dignity in dying.
The LPN/VN uses “specialized knowledge and skills which meet the health needs of people in a variety of settings under the direction of qualified health professionals” (NFLPN, 2003). Considering unique cultural and spiritual client preferences, the applicable standard of care and legal instructions, the LPN/VN uses a clinical problem-solving process (the nursing process) to collect and organize relevant health care data, assist in the identification of the health needs/problems throughout the client’s life span and contribute to the interdisciplinary team in a variety of settings. The entry-level LPN/VN demonstrates the essential competencies needed to care for clients with commonly occurring health problems that have predictable outcomes. “Professional behaviors, within the scope of nursing practice for a practical/vocational nurse, are characterized by adherence to standards of care, accountability of one’s own actions and behaviors, and use of legal and ethical principles in nursing practice” (NAPNES, 2007).

**Classification of Cognitive Levels**

Bloom’s taxonomy for the cognitive domain is used as a basis for writing and coding items for the examination (Bloom et al., 1956; Anderson & Krathwohl, 2001). The practice of practical/vocational nursing requires application of knowledge, skills and abilities; therefore, the majority of items are written at the application or higher levels of cognitive ability.

**Test Plan Structure**

The framework of Client Needs was selected because it provides a universal structure for defining nursing actions and competencies for a variety of clients across all settings and is congruent with state laws/rules.

**Client Needs**

The content of the NCLEX-PN Test Plan is organized into four major Client Needs categories. Two of the four categories are divided into subcategories:

- **Safe and Effective Care Environment**
  - Coordinated Care
  - Safety and Infection Control

- **Health Promotion and Maintenance**

- **Psychosocial Integrity**

- **Physiological Integrity**
  - Basic Care and Comfort
  - Pharmacological Therapies
  - Reduction of Risk Potential
  - Physiological Adaptation
Integrated Processes
The following processes are fundamental to the practice of practical/vocational nursing and are integrated throughout the Client Needs categories and subcategories:

- Clinical Problem-Solving Process (Nursing Process) – a scientific approach to client care that includes data collection, planning, implementation and evaluation.
- Caring – interaction of the LPN/VN and client in an atmosphere of mutual respect and trust. In this collaborative environment, the LPN/VN provides support and compassion to help achieve desired therapeutic outcomes.
- Communication and Documentation – verbal and nonverbal interactions between the LPN/VN and the client, as well as other members of the health care team. Events and activities associated with client care are validated in written and/or electronic records that reflect standards of practice and accountability in the provision of care.
- Teaching and Learning – facilitation of the acquisition of knowledge, skills and attitudes to assist in promoting a change in behavior.
- Culture and Spirituality – interaction of the nurse and the client (individual, family or group, including significant others and population) which recognizes and considers the client-reported, self-identified, unique and individual preferences to client care, the applicable standard of care and legal instructions.

Distribution of Content
The percentage of test items assigned to each Client Needs category and subcategory in the NCLEX-PN Test Plan is based on the results of the Report of Findings from the 2015 LPN/VN Practice Analysis: Linking the NCLEX-PN® Examination to Practice (NCSBN, 2016) and expert judgment provided by members of the NCLEX® Examination Committee.

The NCLEX-PN is administered adaptively in variable length format to target candidate-specific ability. To accommodate possible variations in test length, content area distributions of individual examinations may differ up to ±3% in each category.

**Overview of Content**

All content categories and subcategories reflect client needs across the life span in a variety of settings.

**Safe and Effective Care Environment**

The LPN/VN provides nursing care that contributes to the enhancement of the health care delivery setting and protects clients and health care personnel.

- **Coordinated Care** – The LPN/VN collaborates with health care team members to facilitate effective client care.

  Related content includes, but is **not limited** to:

  - Advance Directives
  - Advocacy
  - Client Care Assignments
  - Client Rights
  - Collaboration with Interdisciplinary Team
  - Concepts of Management and Supervision
  - Confidentiality/Information Security
  - Continuity of Care
  - Establishing Priorities
  - Ethical Practice
  - Informed Consent
  - Information Technology
  - Legal Responsibilities
  - Performance Improvement (Quality Improvement)
  - Referral Process
  - Resource Management
Safety and Infection Control – The LPN/VN contributes to the protection of clients and health care personnel from health and environmental hazards.

Related content includes, but is not limited to:

- Accident/Error/Injury Prevention
- Emergency Response Plan
- Ergonomic Principles
- Handling Hazardous and Infectious Materials
- Home Safety
- Least Restrictive Restraints and Safety Devices
- Reporting of Incident/Event/Irregular Occurrence/Variance
- Safe Use of Equipment
- Security Plan
- Standard Precautions/Transmission-based Precautions/Surgical Asepsis

Health Promotion and Maintenance
The LPN/VN provides nursing care for clients that incorporates the knowledge of expected stages of growth and development, and prevention and/or early detection of health problems.

Related content includes, but is not limited to:

- Aging Process
- Ante/Intra/Postpartum and Newborn Care
- Community Resources
- Data Collection Techniques
- Developmental Stages and Transitions
- Health Promotion/Disease Prevention
- High Risk Behaviors
- Lifestyle Choices
- Self-care

Psychosocial Integrity
The LPN/VN provides care that assists with promotion and support of the emotional, mental and social well-being of clients.

Related content includes, but is not limited to:

- Abuse or Neglect
- Behavioral Management
- Chemical and Other Dependencies
- Coping Mechanisms
- Crisis Intervention
- Cultural Awareness
- End-of-Life Concepts
- Grief and Loss
- Mental Health Concepts
- Religious and Spiritual Influences on Health
- Sensory/Perceptual Alterations
- Stress Management
- Support Systems
- Therapeutic Communication
- Therapeutic Environment
Physiological Integrity
The LPN/VN assists in the promotion of physical health and well-being by providing care and comfort, reducing risk potential for clients and assisting them with the management of health alterations.

- **Basic Care and Comfort** - The LPN/VN provides comfort to clients and assistance in the performance of activities of daily living.

  Related content includes but is **not limited** to:

  - Assistive Devices
  - Elimination
  - Mobility/Immobility
  - Nonpharmacological Comfort Interventions

- **Pharmacological Therapies** - The LPN/VN provides care related to the administration of medications and monitors clients who are receiving parenteral therapies.

  Related content includes but is **not limited** to:

  - Adverse Effects/Contraindications/Side Effects/Interactions
  - Dosage Calculations
  - Expected Actions/Outcomes
  - Medication Administration
  - Pharmacological Pain Management

- **Reduction of Risk Potential** - The LPN/VN reduces the potential for clients to develop complications or health problems related to treatments, procedures or existing conditions.

  Related content includes but is **not limited** to:

  - Changes/Abnormalities in Vital Signs
  - Diagnostic Tests
  - Laboratory Values
  - Potential for Alterations in Body Systems
  - Potential for Complications of Diagnostic Tests/Treatments/Procedures
  - Potential for Complications from Surgical Procedures and Health Alterations
  - Therapeutic Procedures

- **Physiological Adaptation** - The LPN/VN participates in providing care for clients with acute, chronic or life-threatening physical health conditions.

  Related content includes but is **not limited** to:

  - Alterations in Body Systems
  - Basic Pathophysiology
  - Fluid and Electrolyte Imbalances
  - Medical Emergencies
  - Unexpected Response to Therapies
III. 2017 NCLEX-PN® Detailed Test Plan

The NCLEX-PN® Test Plan in the previous section provides a general outline of the categories and subcategories of the examination. The 2017 NCLEX-PN® Detailed Test Plan is used to guide the direction of examination content, which is to be followed by NCLEX® item writers, item reviewers and nurse educators.

The activity statements used in the 2015 LPN/VN Practice Analysis: Linking the NCLEX-PN® Examination to Practice (NCSBN, 2016) preface each of the eight content categories and are identified throughout the detailed test plan by an asterisk (*). NCSBN performs an analysis of those activities used frequently and identified as important by entry-level nurses to ensure client safety. This is called a practice analysis; it provides data to support the NCLEX as a reliable, valid measure of competent, entry-level LPN/VN practice. The practice analysis is conducted at least every three years.

In addition to the practice analysis, NCSBN conducts a knowledge, skills and abilities (KSA) survey. The primary purpose of this study is to identify the knowledge needed by newly licensed practical/vocational nurses in order to provide safe and effective care.

Findings from both the 2015 LPN/VN Practice Analysis: Linking the NCLEX-PN® Examination to Practice (NCSBN, 2016) and the 2015 LPN/VN Nursing Knowledge Survey (NCSBN, 2016) can be found at www.ncsbn.org/1235.htm. Both documents are used in the development of the NCLEX-PN Test Plan, as well as to inform item development.

All task statements in the 2017 NCLEX-PN® Detailed Test Plan require the nurse to apply the fundamental principles of clinical decision making and critical thinking to nursing practice. The detailed test plan also makes the assumption that the nurse integrates concepts from the following bodies of knowledge:

- Social sciences (psychology and sociology); and
- Biological sciences (anatomy, physiology, biology and microbiology).

In addition, the following concepts are utilized throughout the four major Client Needs categories and subcategories of the test plan:

- Clinical Problem-solving Process (Nursing Process);
- Caring;
- Communication and Documentation;
- Teaching and Learning; and
- Culture and Spirituality.

Please Note: There are certain inconsistencies throughout this document related to word usage and punctuation. Sentences or phrases marked by an asterisk (*) are activity statements taken directly from the 2015 LPN/VN Practice Analysis: Linking the NCLEX-PN® Examination to Practice (NCSBN, 2016). In order to provide proper attribution to the original survey these statements have not been altered to fit the overall grammatical style of this document. In addition, the term “client” refers to an individual, family or group, which includes significant others and population. “Clients” are the same as “residents” or “patients.” In general, if the age or age category of the client is not stated in an item, it can be understood that the client is an adult. NCLEX items are developed based on a variety of practice settings, such as acute/critical care, long-term care/rehabilitation care, skilled care, outpatient care and community-based/home care settings.
Safe and Effective Care Environment

Coordinated Care

- Coordinated Care – The LPN/VN collaborates with health care team members to facilitate effective client care.

### COORDINATED CARE

**Related Activity Statements from the Report of Findings from the 2015 LPN/VN Practice Analysis: Linking the NCLEX-PN® Examination to Practice**

- Use data from various sources in making clinical decisions
- Contribute to the development and/or update of the client plan of care
- Assign client care and/or related tasks (e.g., assistive personnel or LPN/VN)
- Organize and prioritize care for assigned group of clients
- Recognize and report staff conflict
- Advocate for client rights and needs
- Promote client self-advocacy
- Participate in quality improvement (QI) activity (e.g., collecting data, serving on QI committee)
- Involve client in care decision making
- Follow up with client after discharge
- Participate in staff education (e.g., inservices and continued competency)
- Recognize task/assignment you are not prepared to perform and seek assistance
- Respond to the unsafe practice of a health care provider (e.g., intervene or report)
- Participate in client discharge or transfer
- Participate in client referral process
- Follow regulation/policy for reporting specific issues (e.g., abuse, neglect, gunshot wound or communicable disease)
- Participate in client consent process
- Maintain client confidentiality
- Provide for privacy needs
- Provide information about advance directives
- Participate in client data collection
- Use information technology in client care
- Apply evidence-based practice when providing care
- Participate as a member of an interdisciplinary team
- Monitor activities of assistive personnel

*Activity Statements used in the 2015 LPN/VN Practice Analysis*
<table>

Related content includes, but is not limited to:

**Advance Directives**
- Provide information about advance directives*
- Review client understanding of advance directives (e.g., living will, health care proxy, Durable Power of Attorney for Health Care [DPAHC])
- Verify the client advance directives status

**Advocacy**
- Advocate for client rights and needs*
- Discuss identified treatment options with client and respect the decisions made
- Promote client self-advocacy*
- Use interpreters to assist in achieving client understanding

**Client Care Assignments**
- Assign client care and/or related tasks (e.g., assistive personnel or LPN/VN)*
- Compare needs of client to knowledge, skills and abilities of assistive personnel prior to making client care assignments
- Organize information for client assignments
- Provide information to supervisor when client care assignments need to be changed (e.g., change in client status)

**Client Rights**
- Inform client of individual rights (e.g., confidentiality, informed consent)
- Involve client in care decision making*
- Intervene if client rights are violated
- Recognize client right to refuse treatment/procedure

**Collaboration with Interdisciplinary Team**
- Identify roles/responsibilities of health care team members
- Identify need for nursing or interdisciplinary client care conference

*Activity Statements used in the 2015 LPN/VN Practice Analysis
- Contribute to the development and/or update of the client plan of care*
- Contribute to planning interdisciplinary client care conferences
- Participate as a member of an interdisciplinary team*

**Concepts of Management and Supervision**
- Recognize and report staff conflict*
- Verify abilities of staff members to perform assigned tasks (e.g., job description, scope of practice, training, experience)
- Provide input for performance evaluation of other staff
- Participate in staff education (e.g., in-services and continued competency)*
- Use data from various sources in making clinical decisions*
- Serve as resource person to other staff
- Monitor activities of assistive personnel*

**Confidentiality/Information Security**
- Identify staff actions that impact client confidentiality and intervene as needed (e.g., access to medical records, discussions at nurses’ station, change-of-shift reports)
- Recognize staff member and client understanding of confidentiality requirements
- Apply knowledge of facility regulations when accessing client records
- Maintain client confidentiality*
- Provide for privacy needs*

**Continuity of Care**
- Follow up with client after discharge*
- Participate in client discharge or transfer*
- Provide follow-up for unresolved client care issues
- Provide and receive report*
- Record client information (e.g., medical record, referral/transfer form)
- Use agency guidelines to guide client care (e.g., clinical pathways, care maps, care plans)

**Establishing Priorities**
- Organize and prioritize care for assigned group of clients*
- Participate in planning client care based upon client needs (e.g., diagnosis, abilities, prescribed treatment)
- Use effective time management skills

**Ethical Practice**
- Identify ethical issues affecting staff or client
- Inform client of ethical issues affecting client care

*Activity Statements used in the 2015 LPN/VN Practice Analysis
- Intervene to promote ethical practice
- Practice in a manner consistent with code of ethics for nurses*
- Review client and staff member knowledge of ethical issues affecting client care

**Informed Consent**
- Identify appropriate person to provide informed consent for client (e.g., client, parent, legal guardian)
- Participate in client consent process*
- Describe informed consent requirements (e.g., purpose for procedure, risks of procedure)
- Recognize that informed consent was obtained (e.g., completed consent form, client understanding of procedure)

**Information Technology**
- Use information technology in client care*
- Access data for client or staff through online databases and journals
- Enter computer documentation accurately, completely and in a timely manner

**Legal Responsibilities**
- Identify legal issues affecting staff and client (e.g., refusing treatment)
- Receive and process health care provider orders*
- Recognize task/assignment you are not prepared to perform and seek assistance*
- Respond to the unsafe practice of a health care provider (e.g., intervene or report)*
- Follow regulation/policy for reporting specific issues (e.g., abuse, neglect, gunshot wound or communicable disease)*
- Document client care
- Provide care within the legal scope of practice*

**Performance Improvement (Quality Improvement)**
- Identify impact of performance improvement/quality improvement activities on client care outcomes
- Participate in quality improvement (QI) activity (e.g., collecting data, serving on QI committee)*
- Document performance improvement/quality improvement activities
- Report identified performance improvement/quality improvement concerns to appropriate personnel (e.g., nurse manager, risk manager)
- Apply evidence-based practice when providing care*

**Referral Process**
- Recognize need for client referral for actual or potential problem (e.g., physical therapy, speech therapy)
- Use appropriate documents to contribute information needed for client referral (e.g., medical record, referral form)

*Activity Statements used in the 2015 LPN/VN Practice Analysis*
- Participate in client data collection*
- Participate in client referral process*

**Resource Management**
- Recognize client need for materials and equipment (e.g., oxygen, suction machine, wound care supplies)
- Review effective use of client care materials by assistive personnel (e.g., supplies)
- Participate in providing cost effective care*

### Sample Item

The nurse has contributed to a staff education program about client confidentiality. Which of the following statements by a staff member would indicate a correct understanding of the teaching?

- a. “The nurse can share client information with housekeeping staff who work on the unit.”
- b. “Only staff actively caring for a client may access the client medical record.” (*key*)
- c. “Staff may provide updates to a client’s family members on the client’s condition if the family members are on hospital premises.”
- d. “Family members are permitted to see the client's medical record if the client provides verbal consent.”

*(Key)* is used throughout this document to denote the correct answer(s) for the exam item.
Safety and Infection Control

- Safety and Infection Control – The LPN/VN contributes to the protection of clients and health care personnel from health and environmental hazards.

**SAFETY AND INFECTION CONTROL**

Related Activity Statements from the *Report of Findings from the 2015 LPN/VN Practice Analysis: Linking the NCLEX-PN® Examination to Practice*

- Assure availability and safe functioning of client care equipment
- Evaluate the appropriateness of health care provider’s order for client
- Verify the identity of client
- Use safe client handling techniques (e.g., body mechanics)
- Maintain standard/universal precautions
- Identify client allergies and intervene as appropriate
- Participate in preparation for internal and external disasters (e.g., fire or natural disaster)
- Identify and address unsafe conditions in health care environment (e.g., environmental, biohazard, fire)
- Implement least restrictive restraints or seclusion
- Use aseptic and sterile techniques
- Follow protocol for timed client monitoring (e.g., safety checks)
- Assist in and/or reinforce education to client about safety precautions
- Identify the need for and implement appropriate isolation techniques
- Initiate and participate in security alert (e.g., infant abduction or flight risk)
- Acknowledge and document practice error (e.g., incident report)
- Use transfer assistive devices (e.g., gait/transfer belt, slide board or mechanical lift)

Related content includes, but is not limited to:

**Accident/Error/Injury Prevention**

- Identify client allergies and intervene as appropriate*
- Identify and facilitate correct use of infant and child car seats by client
- Identify client factors that influence accident/error/injury prevention (e.g., age, developmental stage, lifestyle)
- Recognize what factors related to mental status may contribute to the client potential for accident or injury (e.g., confusion, altered thought processes, diagnosis)
- Determine client/staff member knowledge of safety procedures
- Verify the identity of client*
- Utilize facility client identification procedures (e.g., client name band, allergy bands)
- Monitor client care environment for safety hazard and report problems to appropriate personnel
- Assist in and/or reinforce education to client about safety precautions*

*Activity Statements used in the 2015 LPN/VN Practice Analysis*
- Use transfer assistive devices (e.g., gait/transfer belt, slide board or mechanical lift)*
- Remove fire hazards from client care areas
- Protect client from accident/error/injury (e.g., protect from another individual, falls, environmental hazards, burns)
- Provide client with appropriate method to signal staff members
- Evaluate the appropriateness of health care provider’s order for client*

Emergency Response Plan
- Identify nursing and assistive personnel roles during internal and external disasters
- Participate in preparation for internal and external disasters (e.g., fire or natural disaster)*
- Contribute to selection of client to recommend for discharge in disaster situation

Ergonomic Principles
- Use safe client handling techniques (e.g., body mechanics)*
- Provide instruction and information to client about body positions that prevent stress injuries

Handling Hazardous and Infectious Materials
- Identify and employ methods to control the spread of infectious agents (e.g., cleaning with appropriate solutions)
- Identify and address unsafe conditions in health care environment (e.g., environmental, biohazard, fire)*
- Demonstrate knowledge of facility protocols for handling hazardous and infectious materials

Home Safety
- Identify fire/environmental hazards (e.g., frayed electrical cords, small area rugs, inadequate footwear)
- Determine client understanding of home safety needs
- Provide client with information on home safety
- Reinforce client education on home safety precautions (e.g., home disposal of syringes, lighting, handrails, kitchen safety)

Reporting of Incident/Event/Irregular Occurrence/Variance
- Identify situations requiring completion of incident/event/irregular occurrence/variance report (e.g., medication administration error, client fall)
- Acknowledge and document practice error (e.g., incident report)*
- Monitor client response to error/event/occurrence

Least Restrictive Restraints and Safety Devices
- Demonstrate knowledge of appropriate application of restraints/safety devices
- Follow protocol for timed client monitoring (e.g., safety checks)*
- Implement least restrictive restraints or seclusion*
- Document use of restraints/safety devices and client response
- Check for proper functioning of restraints/safety devices

*Activity Statements used in the 2015 LPN/VN Practice Analysis
Safe Use of Equipment
- Assure availability and safe functioning of client care equipment*
- Follow facility protocols/procedures for safe use of equipment
- Provide safe equipment use for client care (e.g., continuous passive motion [CPM] device, oxygen, mobility aids)

Security Plan
- Initiate and participate in security alert (e.g., infant abduction or flight risk)*
- Use principles of triage and evacuation protocols/procedures
- Monitor effectiveness of security plan

Standard Precautions/Transmission-Based Precautions/Surgical Asepsis
- Identify communicable diseases and modes of transmission (e.g., airborne, droplet, contact)
- Identify client knowledge of infection control procedures
- Identify the need for and implement appropriate isolation techniques*
- Maintain standard/universal precautions*
- Use aseptic and sterile techniques*
- Use appropriate supplies to maintain asepsis (e.g., gloves, mask, sterile supplies)
- Use correct techniques to apply and remove gloves, mask, gown and protective eye wear
- Use correct hand hygiene techniques
- Prevent environmental spread of infectious disease through correct use of equipment
- Protect immunocompromised client from exposure to infectious diseases/organisms
- Monitor client care area for sources of infection
- Set up a sterile field
- Reinforce appropriate infection control procedures with client and staff members

Sample Item
The nurse is caring for a client who has pertussis. Which of the following infection control precautions should the nurse implement?

a. Request the dietary department provide disposable utensils on the client's meal tray.
b. Wear a surgical mask when obtaining the client's vital signs. (key)
c. Remove fresh flowers from the client's room.
d. Place the client in a private room with monitored negative air pressure.
Health Promotion and Maintenance

- Health Promotion and Maintenance – The LPN/VN provides nursing care for clients that incorporate knowledge of expected stages of growth and development, and prevention and/or early detection of health problems.

<table>
<thead>
<tr>
<th>HEALTH PROMOTION AND MAINTENANCE</th>
</tr>
</thead>
<tbody>
<tr>
<td>Related Activity Statements from the Report of Findings from the 2015 LPN/VN Practice Analysis: Linking the NCLEX-PN® Examination to Practice</td>
</tr>
</tbody>
</table>

- Provide care and resources for beginning of life and/or end of life issues and choices
- Assist with fetal heart monitoring for the antepartum client
- Identify community resources for clients
- Assist with monitoring a client in labor
- Monitor recovery of stable postpartum client
- Compare client to developmental norms
- Assist client with expected life transition (e.g., attachment to newborn, parenting, retirement)
- Participate in health screening or health promotion programs
- Provide information for prevention of high risk behaviors
- Identify barriers to communication
- Identify barriers to learning
- Collect data for health history (e.g., client medical history, family medical history)
- Collect baseline physical data (e.g., skin integrity, or height and weight)
- Identify clients in need of immunizations (required and voluntary)
- Provide care that meets the needs of the newborn less than 1 month old through the infant or toddler client through 2 years
- Provide care that meets the needs of the preschool, school age and adolescent client ages 3 through 17 years
- Provide care that meets the needs of the adult client ages 18 through 64 years
- Provide care that meets the needs of the adult client ages 65 through 85 years and over

Related content includes, but is not limited to:

Aging Process

- Identify client knowledge on aging process and assist in reinforcing teaching on expected changes related to aging
- Provide care that meets the needs of the newborn less than 1 month old through the infant or toddler client through 2 years*
- Provide care that meets the needs of the preschool, school age and adolescent client ages 3 through 17 years*

*Activity Statements used in the 2015 LPN/VN Practice Analysis
Provide care that meets the needs of the adult client ages 18 through 64 years
Provide care that meets the needs of the adult client ages 65 through 85 years and over

Ante/Intra/Postpartum and Newborn Care
- Identify client emotional preparedness for pregnancy (e.g., support systems, perception of pregnancy)
- Assist in performing client non-stress test
- Assist with fetal heart monitoring for the antepartum client
- Assist with monitoring a client in labor
- Perform care of postpartum client (e.g., perineal care, assistance with infant feeding)
- Contribute to newborn plan of care
- Reinforce client teaching on infant care skills (e.g., feeding, bathing, positioning)
- Monitor recovery of stable postpartum client
- Monitor client ability to care for infant

Data Collection Techniques
- Collect data for health history (e.g., client medical history, family medical history)
- Collect baseline physical data (e.g., skin integrity, or height and weight)
- Prepare client for physical examination (e.g., reinforce explanation of procedure, provide privacy and comfort)
- Document findings according to agency/facility policies/procedures
- Report client physical examination results to health care provider

Developmental Stages and Transitions
- Identify and report client deviations from expected growth and development
- Identify occurrence of expected body image changes
- Identify barriers to communication
- Identify barriers to learning
- Compare client development to norms
- Assist client with expected life transition (e.g., attachment to newborn, parenting, retirement)
- Assist client to select age-appropriate activities
- Modify approaches to care in accordance with client development stage
- Provide care and resources for beginning of life and/or end of life issues and choices
- Determine client acceptance of expected body image change (e.g., aging, pregnancy, menopause)
- Determine impact of expected body image changes on client (e.g., temperament)

Health Promotion/Disease Prevention
- Identify risk factors for disease/illness (e.g., age, gender, ethnicity, lifestyle)
- Identify clients in need of immunizations (required and voluntary)
- Identify precautions and contraindications to immunizations

*Activity Statements used in the 2015 LPN/VN Practice Analysis
- Identify client health seeking behaviors (e.g., breast and testicular self-examinations)
- Gather data on client health history and risk for disease (e.g., lifestyle, family and genetic history)
- Check results of client health screening tests (e.g., Papanicolaou [Pap] test or smear, stool occult blood test)
- Provide assistance for screening examinations (e.g., scoliosis, breast and testicular self-examinations, blood pressure check)
- Participate in a health screening or health promotion programs*
- Assist client in disease prevention activities
- Monitor client actions to maintain health and prevent disease (e.g., smoking cessation, exercise, diet, stress management)
- Monitor incorporation of healthy behaviors into lifestyle by client (e.g., screening examinations, immunizations, limiting risk taking behaviors)
- Recognize client unexpected response to immunizations

High Risk Behaviors
- Assist client to identify high risk behaviors
- Provide information for prevention of high risk behaviors*
- Monitor client lifestyle practice risks that may impact health (e.g., excessive sun exposure, lack of regular exercise)
- Reinforce client teaching related to client high risk behavior (e.g., unprotected sexual relations, needle sharing)

Lifestyle Choices
- Identify client lifestyle practices that may have an impact on health
- Identify contraindications to chosen contraceptive method (e.g., smoking, compliance, medical conditions)
- Identify client attitudes/perceptions on sexuality
- Recognize client need/desire for contraception
- Recognize expected outcomes for client family planning methods
- Recognize client need to discuss sensitive issues related to sexuality
- Support client in family planning
- Respect client lifestyle choices (e.g., child-free, home schooling, rural or urban living)
- Reinforce teaching with client on healthy lifestyle choices (e.g., exercise regimen, smoking cessation)

Self-care
- Determine client ability and support for performing self-care (e.g., feeding, dressing, hygiene)
- Consider client self-care needs before contributing to changes in plan of care
- Monitor client ability to perform instrumental activities of daily living (e.g., using telephone, shopping, preparing meals)

*Activity Statements used in the 2015 LPN/VN Practice Analysis
**Community Resources**

- Identify community resources for clients*
- Assist and/or participate in community health education
- Reinforce teaching with client about health risks based on family, population, and/or community characteristics

### Sample Item

The nurse has reinforced teaching with a client about prevention of coronary artery disease (CAD). Which of the following statements by the client would indicate a correct understanding of the teaching?

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>a. “I should enroll in a smoking cessation program.” (key)</td>
<td></td>
</tr>
<tr>
<td>b. “I will increase my daily intake of foods high in potassium.”</td>
<td></td>
</tr>
<tr>
<td>c. “I will avoid performing isometric exercises more than three times per week.”</td>
<td></td>
</tr>
<tr>
<td>d. “I can decrease my high density lipoprotein level (HDL) if I stop drinking alcohol.”</td>
<td></td>
</tr>
</tbody>
</table>

*Activity Statements used in the 2015 LPN/VN Practice Analysis
Psychosocial Integrity

- Psychosocial Integrity – The LPN/VN provides care that assists with promotion and support of the emotional, mental and social well-being of clients.

**PSYCHOSOCIAL INTEGRITY**

**Related Activity Statements Report of Findings from the 2015 LPN/VN Practice Analysis:**

*Linking the NCLEX-PN® Examination to Practice*

- Provide emotional support to client
- Collect data regarding client psychosocial functioning
- Identify client use of effective and ineffective coping mechanisms
- Promote positive self-esteem of client
- Identify stressors that may affect recovery or health maintenance (e.g., lifestyle, body changes, environmental)
- Collect data on client’s potential for violence to self and others
- Identify signs and symptoms of substance abuse, chemical dependency, withdrawal or toxicity
- Assist in and/or reinforce education to caregivers/family on ways to manage client with behavioral disorders
- Participate in behavior management program by recognizing environmental stressors and/or providing a therapeutic environment
- Explore why client is refusing or not following treatment plan
- Participate in client group session
- Plan care with consideration of client spiritual or cultural beliefs
- Assist in managing the care of angry and/or agitated client (e.g., de-escalation techniques)
- Participate in reminiscence therapy, validation therapy or reality orientation
- Assist in the care of the cognitively impaired client
- Assist client to cope/adapt to stressful events and changes in health status (e.g., abuse, neglect, end of life, grief and loss, life changes or physical changes)
- Use therapeutic communication techniques with client
- Assist in the care of a client experiencing sensory/perceptual alterations

Related content includes, but is **not limited** to:

**Abuse or Neglect**

- Identify client risk factors for abusing or neglecting others
- Identify signs and symptoms of physical, psychological or financial abuse in client (e.g., family involvement, inadequate weight gain, poor hygiene)

*Activity Statements used in the 2015 LPN/VN Practice Analysis*
- Recognize risk factors for domestic, child and/or elder abuse/neglect and sexual abuse
- Provide safe environment for abused/neglected client
- Provide emotional support to client who experienced abuse or neglect
- Reinforce client teaching on coping strategies to prevent abuse or neglect
- Evaluate client response to interventions

**Behavioral Management**
- Monitor client appearance, mood and psychomotor behavior and observe for changes
- Explore cause of client behavior
- Assist client with achieving self-control of behavior (e.g., contract, behavior modification)
- Assist client in using behavioral strategies to decrease anxiety
- Assist in or reinforce education to caregivers/family on ways to manage client with behavioral disorders*
- Participate in behavior management program by recognizing environmental stressors and/or providing a therapeutic environment*
- Participate in reminiscence therapy, validation therapy or reality orientation*
- Participate in client group session*
- Reinforce client participation in therapy
- Use behavioral management techniques when caring for a client (e.g., positive reinforcement, setting limits)
- Evaluate client response to behavioral management interventions

**Chemical and Other Dependencies**
- Identify signs and symptoms of substance abuse, chemical dependency, withdrawal or toxicity*
- Plan and provide care to client experiencing substance-related withdrawal or toxicity (e.g., nicotine, opioid, sedative)
- Provide care and support for client with impulse-control disorders (e.g., gambling, sexual addiction, pornography)
- Reinforce provided information on substance abuse diagnosis and treatment plan to client
- Encourage client participation in support groups (e.g., Alcoholics Anonymous, Narcotics Anonymous)
- Monitor client response to treatment plan and contribute to revision of plan as needed

**Coping Mechanisms**
- Collect data regarding client psychosocial functioning*
- Identify client support systems and available resources
- Identify client use of effective and ineffective coping mechanisms*
- Identify stressors that may affect recovery/health maintenance (e.g., lifestyle, body changes, environmental)*
- Recognize abilities of client to adapt to temporary/permanent role changes
- Recognize client response to illness (e.g., rationalization, hopelessness, anger)
- Provide support to the client with unexpected altered body image (e.g., alopecia)

*Activity Statements used in the 2015 LPN/VN Practice Analysis*
Use therapeutic techniques to assist client with coping ability

Assist client to cope/adapt to stressful events and changes in health status (e.g., abuse/neglect, end of life, grief and loss, life changes or physical changes)*

Assist client in maintaining level of independence after unexpected body image changes (e.g., amputation, paralysis)

Monitor client progress toward achieving improved body image (e.g., mastectomy, colostomy)

**Crisis Intervention**

- Identify client in crisis
- Identify client risk for self injury and/or violence (e.g., suicide or violence precaution)
- Collect data on client’s potential for violence to self and others*
- Assist in managing the care of angry and/or agitated client (e.g., de-escalation techniques)*
- Use crisis intervention techniques to assist client in coping
- Provide opportunities for client to understand why the crisis occurred
- Guide client to resources for recovery from crisis (e.g., social supports)
- Reinforce client teaching on suicide/violence prevention
- Report changes in client behavior (indicating a developing crisis) to supervisor

**Cultural Awareness**

- Identify importance of client culture/ethnicity when planning/providing/monitoring care
- Recognize client cultural practices that may affect interventions for procedures/surgery (e.g., direct eye contact)
- Recognize cultural issues that may impact client understanding/acceptance of psychiatric diagnosis
- Plan care with consideration of client spiritual or cultural beliefs*
- Respect cultural background/practices of client (does not include dietary preferences)
- Document how client language needs are met

**End-of-Life Concepts**

- Identify client end-of-life needs (e.g., financial concerns, fear, loss of control, role changes)
- Identify client ability to cope with end-of-life interventions
- Provide care or support for client/family at end-of-life
- Assist client in resolution of end-of-life issues

**Grief and Loss**

- Identify client reaction to loss (e.g., denial, fear)
- Support the client in anticipatory grieving
- Reinforce client teaching on expected client reactions to grief and loss (e.g., denial, fear)
- Provide client with resources to adjust to loss/bereavement (e.g., individual counseling, support groups)

*Activity Statements used in the 2015 LPN/VN Practice Analysis*
Mental Health Concepts
- Identify expected behaviors of client with independent or dependent personality
- Identify client symptoms of acute or chronic mental illness (e.g., schizophrenia, depression, bipolar disorder)
- Recognize client use of defense mechanisms
- Recognize change in client mental status
- Recognize client symptoms of relapse
- Explore why client is refusing or not following treatment plan*
- Assist in the care of a client experiencing sensory/perceptual alterations*
- Assist in the care of the cognitively impaired client*
- Assist in promoting client independence
- Promote positive self-esteem of client*

Religious and Spiritual Influences on Health
- Identify client emotional problems related to religious/spiritual beliefs (e.g., spiritual distress, conflict between recommended treatment and beliefs)
- Recognize effect of client religious/spiritual beliefs on plan of care
- Assist client to meet religious/spiritual needs (e.g., referral to pastoral care)
- Assist in evaluation of client religious/spiritual needs related to necessary nursing interventions
- Respect client religious/spiritual beliefs

Sensory/Perceptual Alterations
- Identify needs of client with altered sensory perception (e.g., hallucinations, delirium)
- Verify client ability to effectively communicate needs

Stress Management
- Identify actual/potential stressors for client (e.g., fear, lack of information)
- Implement measures to reduce environmental stressors (e.g., noise, temperature, pollution)
- Monitor client effective use of stress management techniques

Support Systems
- Determine client abilities to provide client support
- Identify client support systems/resources
- Identify family response to client illness (e.g., acute episodes, chronic disorder, terminal illness)

Therapeutic Communication
- Provide emotional support to client*
- Assist client in communicating needs to health care staff
- Develop and maintain therapeutic relationships with client

*Activity Statements used in the 2015 LPN/VN Practice Analysis
Respect client personal values and beliefs
Establish a trusting nurse-client relationship
Use therapeutic communication techniques with client*
Encourage client appropriate use of verbal and non-verbal communication
Monitor effectiveness of communications with client

**Therapeutic Environment**
- Identify external factors that may interfere with client recovery (e.g., stressors, noise)
- Participate in community meetings
- Contribute to maintaining a safe and supportive environment for client
- Monitor client response to environmental factors

---

**Sample Item**

The nurse is contributing to a staff education program about anorexia nervosa (AN). Which of the following information should the nurse recommend including?

a. Clients with AN often perform poorly in school.
b. There are several underlying physiologic causes for AN.
c. The average age of onset for AN is 22 years old.
d. Amenorrhea is a common symptom associated with AN. *(key)*
Physiological Integrity

Basic Care and Comfort

- Basic Care and Comfort – The LPN/VN provides comfort to clients and assistance in the performance of activities of daily living.

<table>
<thead>
<tr>
<th>BASIC CARE AND COMFORT</th>
</tr>
</thead>
<tbody>
<tr>
<td>Related Activity Statements from the Report of Findings from the 2015 LPN/VN Practice Analysis: Linking the NCLEX-PN® Examination to Practice</td>
</tr>
</tbody>
</table>

- Provide site care for client with enteral tubes
- Use alternative/complementary therapy in providing client care (e.g., music therapy)
- Provide for mobility needs (e.g., ambulation, range of motion, transfer, repositioning, use of adaptive equipment)
- Provide feeding for client with enteral tubes
- Monitor and provide for nutritional needs of client
- Provide non-pharmacological measures for pain relief (e.g., imagery, massage or repositioning)
- Assist with activities of daily living
- Provide care to client with bowel or bladder management protocol
- Evaluate pain using standardized rating scales
- Provide measures to promote sleep/rest
- Use measures to promote sleep/rest
- Assist in providing postmortem care
- Perform an irrigation of urinary catheter, bladder, wound, ear, nose or eye
- Assist in the care and comfort for a client with a visual and/or hearing impairment
- Monitor client intake/output
- Provide care to an immobilized client (e.g., traction, bedridden)

Related content includes, but is not limited to:

**Assistive Devices**

- Identify appropriate use of assistive devices (e.g., cane, walker, crutches)
- Contribute to care of client using assistive device (e.g., feeding devices, telecommunication devices, touch pad, communication board)
- Reinforce teaching for client using assistive device
- Review correct use of assistive devices to client and staff members

*Activity Statements used in the 2015 LPN/VN Practice Analysis*
Elimination
- Identify client at risk for impaired elimination (e.g., medication, hydration status)
- Provide care to client with bowel or bladder management protocol*
- Monitor client bowel sounds
- Perform an irrigation of urinary catheter, bladder, wound, ear, nose or eye*
- Provide skin care to client who is incontinent (e.g., wash frequently, barrier creams/ointments)

Mobility/Immobility
- Identify signs and symptoms of venous insufficiency and intervene to promote venous return (e.g., elastic stockings, sequential compression device)
- Check client for mobility, gait, strength, motor skills
- Provide for mobility needs (e.g., ambulation, range of motion, transfer, repositioning, use of adaptive equipment)*
- Reinforce client teaching on methods to maintain mobility (e.g., active/passive range of motion [ROM], strengthening, isometric exercises)
- Use measures to maintain or improve client skin integrity*
- Maintain client correct body alignment
- Provide care to an immobilized client (e.g., traction, bedridden)*

Nonpharmacological Comfort Interventions
- Identify client need for palliative/comfort care
- Assist in the care and comfort for a client with a visual and/or hearing impairment*
- Assist in planning comfort interventions for client with impaired comfort
- Apply therapies for comfort and treatment of inflammation/swelling (e.g., apply heat and cold treatments, elevate limb)
- Use alternative/complementary therapy in providing client care (e.g., music therapy)*
- Provide non-pharmacological measures for pain relief (e.g., imagery, massage or repositioning)*
- Provide palliative/comfort care interventions to client
- Respect client palliative care choices
- Reinforce client teaching on stress management techniques (e.g., relaxation exercises, exercise, meditation)
- Reinforce client teaching on palliative/comfort care
- Monitor client non-verbal signs of pain/discomfort (e.g., grimacing, restlessness)
- Monitor client response to nonpharmacological interventions
- Monitor outcome of palliative care interventions
- Evaluate pain using standardized rating scales*

*Activity Statements used in the 2015 LPN/VN Practice Analysis
Nutrition and Oral Hydration
- Identify client potential for aspiration (e.g., feeding tube, sedation, swallowing difficulties)
- Check client feeding tube placement and patency
- Provide feeding for client with enteral tubes*
- Monitor and provide for nutritional needs of client*
- Monitor client ability to eat (e.g., chew, swallow)
- Monitor impact of disease/illness on client nutritional status
- Monitor client intake/output*
- Reinforce client teaching on special diets based on client diagnosis/nutritional needs and cultural considerations (e.g., high protein, kosher diet, calorie restriction)
- Promote client independence in eating

Personal Hygiene
- Determine client usual personal hygiene habits/routine
- Assist with activities of daily living*
- Assist in providing postmortem care*
- Provide site care for client with enteral tubes*
- Reinforce teaching to client on required adaptations for performing activities of daily living (e.g., shower chair, hand rails)

Rest and Sleep
- Identify client usual rest and sleep patterns (e.g., bedtime, sleep rituals)
- Provide measures to promote sleep/rest*
- Schedule client care activities to promote adequate rest and sleep

Sample Item
The nurse is reinforcing teaching about mouth care for a client who has stomatitis. Which of the following statements by the client would indicate a correct understanding of the teaching? Select all that apply.

- a. “I should apply lubricant to my lips frequently to keep my lips moist.” (key)
- b. “I will use a soft-bristle toothbrush to brush my teeth.” (key)
- c. “I should use an alcohol-based mouth wash twice daily.”
- d. “I will remove any white or yellow patches from my tongue.”
- e. “I should drink warm liquids every two hours to decrease my discomfort.”

*Activity Statements used in the 2015 LPN/VN Practice Analysis
Pharmacological Therapies

Pharmacological Therapies – The LPN/VN provides care related to the administration of medications and monitors clients who are receiving parenteral therapies.

<table>
<thead>
<tr>
<th>PHARMACOLOGICAL THERAPIES</th>
</tr>
</thead>
<tbody>
<tr>
<td>Related Activity Statements from the Report of Findings from the 2015 LPN/VN Practice Analysis: Linking the NCLEX-PN® Examination to Practice</td>
</tr>
</tbody>
</table>

- Follow the rights of medication administration
- Reconcile and maintain medication list or medication administration record (e.g., prescribed medications, herbal supplements, over-the-counter medications)
- Monitor transfusion of blood product
- Calculate and monitor intravenous (IV) flow rate
- Administer medication by oral route
- Administer medication by gastrointestinal tube (e.g., g-tube, nasogastric (NG) tube, g-button, j-tube)
- Administer a subcutaneous, intradermal or intramuscular medication
- Administer medication by ear, eye, nose, inhalation, rectum, vagina or skin route
- Count narcotics/controlled substances
- Maintain pain control devices (e.g., epidural, patient control analgesia, peripheral nerve catheter)
- Administer intravenous piggyback (secondary) medications
- Collect required data prior to medication administration
- Evaluate client response to medication (e.g., adverse reactions, interactions, therapeutic effects)
- Reinforce education to client regarding medications
- Maintain medication safety practices (e.g., storage, checking for expiration dates or compatibility)
- Perform calculations needed for medication administration

Related content includes, but is not limited to:

**Adverse Effects/Contraindications/Side Effects/Interactions**

- Identify potential and actual incompatibilities of client medications
- Identify a contraindication to the administration of a prescribed or over-the-counter medication to the client
- Identify symptoms of an allergic reaction (e.g., to medication)
- Implement procedures to counteract adverse effects of medications
- Withhold medication dose if client experiences adverse effect to medication

*Activity Statements used in the 2015 LPN/VN Practice Analysis*
- Monitor and document client response to actions taken to counteract adverse effects of medications
- Monitor client for actual and potential adverse effects of medications (e.g., prescribed, over-the-counter and/or herbal supplements)
- Monitor anticipated interactions among client prescribed medications and fluids (e.g., oral, IV, subcutaneous, IM, topical)
- Monitor and document client side effects to medications
- Monitor and document client response to management of medication side effects including prescribed, over-the-counter and herbal supplements
- Reinforce client teaching on possible effects of medications (common side effects or adverse effects, when to notify primary health care provider)
- Notify primary health care provider of actual/potential adverse effects of client medications

**Dosage Calculations**
- Perform calculations needed for medication administration*
- Use clinical decision making when calculating doses

**Expected Actions/Outcomes**
- Identify client expected response to medication
- Use resources to check on purposes and actions of pharmacological agents
- Apply knowledge of pathophysiology when addressing client pharmacological agents
- Monitor client use of medications over time (e.g., prescription, over-the-counter, home remedies)
- Reinforce education to client regarding medications*
- Reinforce client teaching on actions and therapeutic effects of medications and pharmacological interactions
- Evaluate client response to medication (e.g., adverse reactions, interactions, therapeutic effects)*

**Medication Administration**
- Identify client need for PRN medications
- Mix client medication from two vials as necessary (e.g., insulin)
- Follow the rights of medication administration*
- Maintain medication safety practices (e.g., storage, checking for expiration dates or compatibility)*
- Reconcile and maintain medication list or medication administration record (e.g., prescribed medications, herbal supplements, over-the-counter medications)*
- Collect required data prior to medication administration*
- Assist in preparing client for insertion of central line
- Administer medication by oral route*
- Administer intravenous piggyback (secondary) medications*
- Administer medication by gastrointestinal tube (e.g., g-tube, nasogastric [NG] tube, g-button, j-tube)*

*Activity Statements used in the 2015 LPN/VN Practice Analysis
- Administer a subcutaneous, intradermal or intramuscular medication*
- Administer medication by ear, eye, nose, inhalation, rectum, vagina or skin route*
- Dispose of client unused medications according to facility/agency policy
- Count narcotics/controlled substances*
- Calculate and monitor intravenous (IV) flow rate*
- Monitor transfusion of blood product*
- Reinforce client teaching on client self administration of medications (e.g., insulin, subcutaneous insulin pump)

**Pharmacological Pain Management**
- Identify client need for pain medication
- Monitor and document client response to pharmacological interventions (e.g., pain rating scale, verbal reports)
- Maintain pain control devices (e.g., epidural, patient control analgesia, peripheral nerve catheter)*

*Activity Statements used in the 2015 LPN/VN Practice Analysis*
Reduction of Risk Potential

- Reduction of Risk Potential – The LPN/VN reduces the potential for clients to develop complications or health problems related to treatments, procedures or existing conditions.

REDUCTION OF RISK POTENTIAL

Related Activity Statements from the Report of Findings from the 2015 LPN/VN Practice Analysis: Linking the NCLEX-PN® Examination to Practice

- Identify client risk and implement interventions
- Check for urinary retention (e.g., bladder scan/ultrasound or palpation)
- Collect specimen for diagnostic testing (e.g., blood, urine, stool, sputum)
- Monitor continuous or intermittent suction of nasogastric (NG) tube
- Monitor diagnostic or laboratory test results
- Identify signs or symptoms of potential prenatal complication
- Check and monitor client vital signs
- Perform neurological checks
- Perform circulatory checks
- Implement measures to prevent complication of client condition or procedure (e.g., circulatory complication, seizure, aspiration or potential neurological disorder)
- Evaluate client oxygen (O2) saturation
- Perform an electrocardiogram (EKG/ECG)
- Assist with the performance of a diagnostic or invasive procedure
- Perform venipuncture for blood draws
- Apply and check proper use of compression stockings and/or sequential compression devices (SCD)
- Provide care for client before surgical procedure and reinforce education
- Insert, maintain and remove urinary catheter
- Insert, maintain and remove nasogastric (NG) tube
- Perform blood glucose monitoring
- Maintain central venous catheter
- Maintain and remove peripheral intravenous (IV) catheter

Related content includes, but is not limited to:

Changes/Abnormalities in Vital Signs
- Check and monitor client vital signs*
- Compare vital signs to client baseline vital signs
- Reinforce client teaching about normal and abnormal vital signs (e.g., hypertension, tachypnea, bradycardia, fever)

*Activity Statements used in the 2015 LPN/VN Practice Analysis
Diagnostic Tests
- Perform an electrocardiogram (EKG/ECG)*
- Perform diagnostic testing (e.g., blood glucose, oxygen saturation, testing for occult blood)
- Reinforce client teaching about diagnostic test

Laboratory Values
- Identify laboratory values for ABGs (pH, PO₂, PCO₂, SaO₂, HCO₃), BUN, cholesterol (total), glucose, hematocrit, hemoglobin, glycosylated hemoglobin (HgbA₁C), platelets, potassium, sodium, WBC, creatinine, PT, PTT & APTT, INR
- Compare client laboratory values to normal laboratory values
- Perform venipuncture for blood draws*
- Perform blood glucose monitoring*
- Collect specimen for diagnostic testing (e.g., blood, urine, stool, or sputum)*
- Maintain central venous catheter*
- Reinforce client teaching on purposes of laboratory tests
- Monitor diagnostic or laboratory test results*
- Notify primary health care provider about client laboratory test results

Potential for Alterations in Body Systems
- Identify signs or symptoms of potential prenatal complication*
- Identify client with increased risk for insufficient blood circulation (e.g., immobilized limb, diabetes)
- Recognize change in client neurological status (level of consciousness, orientation, muscle strength)
- Compare current client clinical data to baseline information
- Perform neurological checks*
- Perform circulatory checks*
- Check for urinary retention (e.g., bladder scan/ultrasound or palpation)*
- Apply and check proper use of compression stockings and/or sequential compression devices (SCD)*
- Monitor client output for changes from baseline (e.g., nasogastric emesis, stool, urine)
- Reinforce client teaching on methods to prevent complications associated with activity level/diagnosed illness/disease (e.g., foot care for client with diabetes mellitus)

Potential for Complications of Diagnostic Tests/Treatments/Procedures
- Identify client response to diagnostic tests/treatments/procedures
- Maintain client tube patency (e.g., chest tube, tracheostomy tube)
- Provide care for client receiving electroconvulsive therapy (ECT)
- Provide appropriate follow-up after incident (e.g., fall, client elopement, or medication error)
- Identify client risk and implement interventions*

*Activity Statements used in the 2015 LPN/VN Practice Analysis
Monitor continuous or intermittent suction of nasogastric (NG) tube*
Implement measures to prevent complication of client condition or procedure (e.g., circulatory complication, seizure, aspiration or potential neurological disorder)*
Reinforce teaching to prevent complications due to client diagnostic tests/treatments/procedures
Notify primary health care provider if client has signs of potential complications (e.g., fever, hypotension, limb pain, thrombus formation)
Evaluate client oxygen (O₂) saturation*
Suggest change in interventions based on client response to diagnostic tests/treatments/procedures

Potential for Complications from Surgical Procedures and Health Alterations
Identify client response to surgery or health alterations
Provide care for client before surgical procedure and reinforce education*
Provide intra-operative care (e.g., positioning client for surgery, maintaining sterile field, or providing operative observation)
Reinforce teaching to prevent complications due to surgery or health alterations (e.g., cough and deep breathing, elastic stockings)
Suggest change in interventions based on client response to surgery or health alterations

Therapeutic Procedures
Insert, maintain and remove urinary catheter*
Insert, maintain and remove nasogastric (NG) tube*
Maintain and remove peripheral intravenous (IV) catheter*
Assist with the performance of a diagnostic or invasive procedure*
Reinforce client teaching on treatments and procedures

*Activity Statements used in the 2015 LPN/VN Practice Analysis*
Physiological Adaptation

- Physiological Adaptation – The LPN/VN participates in providing care for clients with acute, chronic or life-threatening physical health conditions.

**PHYSIOLOGICAL ADAPTATION**

Related Activity Statements from the *Report of Findings from the 2015 LPN/VN Practice Analysis: Linking the NCLEX-PN® Examination to Practice*

- Reinforce education to client regarding care and condition
- Provide care for client drainage device (e.g., wound drain or chest tube)
- Remove client wound drainage device
- Identify and/or intervene to control signs of hypoglycemia or hyperglycemia
- Provide cooling/warming measures to restore normal body temperature
- Perform wound care and/or dressing change
- Respond/intervene to a client life-threatening situation (e.g., cardiopulmonary resuscitation)
- Intervene to improve client respiratory status (e.g., breathing treatment, suctioning or repositioning)
- Provide care for a client with a tracheostomy
- Remove wound sutures or staples
- Provide care to client on ventilator
- Perform check of client pacemaker
- Perform care for client after surgical procedure
- Recognize and report basic abnormalities on a client cardiac monitor strip
- Provide care to client with an ostomy (e.g., colostomy, ileostomy or urostomy)
- Identify signs and symptoms related to acute or chronic illness
- Recognize and report change in client condition

Related content includes, but is not limited to:

**Alterations in Body Systems**

- Identify signs and symptoms of an infection (e.g., temperature changes, swelling, redness, mental confusion or foul smelling urine)
- Identify and/or intervene to control signs of hypoglycemia or hyperglycemia*
- Recognize and report basic abnormalities on a client cardiac monitor strip*
- Provide care for client drainage device (e.g., wound drain or chest tube)*
- Provide cooling/warming measures to restore normal temperature*
- Provide care for a client with a tracheostomy*
- Provide care to client with an ostomy (e.g., colostomy, ileostomy or urostomy)*
- Provide care to client on ventilator*

*Activity Statements used in the 2015 LPN/VN Practice Analysis
Provide care to correct client alteration in body system
Provide care to client undergoing peritoneal dialysis
Provide care for client experiencing increased intracranial pressure
Provide care to client who has experienced a seizure
Provide care for client experiencing complications of pregnancy/labor and/or delivery (e.g., eclampsia, precipitous labor, hemorrhage)
Perform wound care and/or dressing change*
Perform check of client pacemaker*
Perform care for client after surgical procedure*
Remove wound sutures or staples*
Remove client wound drainage device*
Intervene to improve client respiratory status (e.g., breathing treatment, suctioning or repositioning)*
Reinforce client teaching on ostomy care
Reinforce education to client regarding care and condition*
Notify primary health care provider of a change in client status
Document client response to interventions for alteration in body systems (e.g., pacemaker, chest tube)

Basic Pathophysiology
- Identify signs and symptoms related to an acute or chronic illness*
- Consider general principles of client disease process when providing care (e.g., injury and repair, immunity, cellular structure)
- Apply knowledge of pathophysiology to monitoring client for alterations in body systems

Fluid and Electrolyte Imbalances
- Identify signs and symptoms of client fluid and/or electrolyte imbalances
- Provide interventions to restore client fluid and/or electrolyte balance
- Monitor client response to interventions to correct fluid and/or electrolyte imbalance

Medical Emergencies
- Respond/intervene to a client life-threatening situation (e.g., cardiopulmonary resuscitation)*
- Provide emergency care for wound disruption (e.g., evisceration, dehiscence)
- Notify primary health care provider about client unexpected response/emergency situation
- Recommend change in emergency treatment based upon client response to interventions
- Reinforce teaching of emergency intervention explanations to client
- Review and document client response to emergency interventions (e.g., restoration of breathing, pulse)

*Activity Statements used in the 2015 LPN/VN Practice Analysis
Unexpected Response to Therapies
- Identify and treat a client intravenous (IV) line infiltration
- Recognize and report change in client condition*
- Intervene in response to client unexpected negative response to therapy (e.g., unexpected bleeding)
- Document client unexpected response to therapy
- Promote recovery from client unexpected negative response to therapy (e.g., urinary tract infection)

Sample Item
The nurse is collecting data from a client who is reporting diarrhea for the past 72 hours. Which of the following findings would indicate the client is experiencing a fluid volume deficit? Select all that apply.

a. Orthostatic hypotension (key)
b. Excessive thirst (key)
c. Dry tongue (key)
d. Bradycardia
e. Increased urine output

*Activity Statements used in the 2015 LPN/VN Practice Analysis
IV. Administration of the NCLEX-PN® Examination

Examination Length
The NCLEX-PN® Examination is a variable length computerized adaptive test (CAT). It is not offered in paper-and-pencil or oral examination formats, and can be anywhere from 85 to 205 items long. Of these items, 25 are pretest items that are not scored. The time limit for the exam is specified in the NCLEX Candidate Bulletin, which can be found at www.ncsbn.org/1213.htm. It is important to note that the time allotted for the examination includes the tutorial, sample items, all breaks (restroom, stretching, etc.) and the examination. All breaks are optional.

The length of the examination is determined by the candidate's responses to the items. After the minimum number of items has been answered, testing stops when the candidate's ability is determined to be either above or below the passing standard with 95 percent certainty. Depending upon the particular pattern of correct and incorrect responses, different candidates will take different numbers of items and therefore use varying amounts of time. The examination will stop when the maximum number of items has been taken or when the time limit has been reached. Remember, it is in the candidate's best interest to maintain a reasonable pace of spending only one or two minutes on each item. The candidate should select a pace that will permit them to complete the examination within the allotted time should the maximum number of items be administered.

It is important to understand that the length of an examination is not an indication of a pass or fail result. A candidate with a relatively short examination may pass or fail just as a candidate with a long examination may pass or fail. Regardless of the length of the examination, each candidate is given an examination that conforms to the NCLEX-PN Test Plan and offers ample opportunity to demonstrate his or her ability.

The Passing Standard
The NCSBN Board of Directors (BOD) re-evaluates the passing standard once every three years. The criterion that the BOD uses to set the standard is the minimum level of ability required for safe and effective entry-level nursing practice.

To assist the BOD in making this decision, board members are provided with the following information:
1. The results of a standard setting exercise performed by a panel of experts with the assistance of professional psychometricians;
2. The historical record of the passing standard with summaries of the candidate performance associated with those standards;
3. The results of a standard-setting survey sent to educators and employers; and
4. Information describing the educational readiness of high school graduates who express an interest in nursing.

Once the passing standard is set, it is imposed uniformly on every test record according to the procedures laid out in the Scoring the NCLEX section. To pass the NCLEX, a candidate must perform above the passing standard. There is no fixed percentage of candidates that pass or fail each examination.
Similar Items
Occasionally, a candidate may receive an item that seems to be very similar to an item received earlier in the examination. This could happen for a variety of reasons. For example, several items could be about similar symptoms, diseases or disorders, yet address different phases of the nursing process. Alternatively, a pretest (unscored) item could be about content similar to an operational (scored) item. It is incorrect to assume that a second item, which is similar in content to a previously administered item, is administered because the candidate answered the first item incorrectly. The candidate is instructed to always select the answer believed to be correct for each item administered. All examinations conform to their respective test plan.

Reviewing Answers and Guessing
The items are presented to the candidate one at a time on a computer screen. Each item can be viewed as long as the candidate likes, but it is not possible to go back to a previous item once the answer is selected and confirmed by pressing the <NEXT> button. Every item must be answered even if the candidate is not sure of the right answer. The computer will not allow the candidate to go on to the next item without answering the one on the screen. If the candidate is unsure of the correct answer, the best guess is made and the candidate moves on to the next item. After an answer to an item is selected, the candidate has a chance to think about the answer and change it if necessary. However, once the candidate confirms the answer and goes on to the next item, the candidate will not be allowed to go back to any previous item on the examination.

Please note that rapid guessing can drastically lower a score. Some test preparation companies have realized that on certain paper-and-pencil tests, unanswered items are marked as wrong. To improve the candidate’s score when they are running out of time, these companies sometimes advocate rapid guessing (perhaps without even reading the item) in the hope that the candidate will get at least a few items correct. On any adaptive test, this can be disastrous. It has the effect of giving the candidate easier items which he or she will likely also get wrong. The best advice is to (1) maintain a reasonable pace, perhaps one item every minute or two; and (2) carefully read and consider each item before answering.

Scoring the NCLEX®
Computerized Adaptive Testing (CAT)
The NCLEX is different than a traditional paper-and-pencil examination. Typically, paper-and-pencil examinations administer the same items to every candidate, thus ensuring that the difficulty of the examination is the same across the board. Because the difficulty of the examination is constant, the percentage correct is the indicator of the candidate’s ability. One disadvantage of this approach is that it is inefficient. It requires the high ability candidates to answer all the easy items on the examination, which provides very little information about his or her ability. Another disadvantage is that guessing can artificially inflate the scores of low ability candidates because they can answer these items correctly 25 percent of the time for reasons that have nothing to do with his or her ability.

Instead, the NCLEX uses computerized adaptive testing (CAT) to administer the items. CAT is able to produce exam results that are more stable using fewer items by targeting items to the candidate’s ability. The computer’s goal during the NCLEX is to determine the ability of the candidate in relation to the passing standard. Every time
the candidate answers an item, the computer re-estimates the candidate's ability. With each additional answered item, the ability estimate becomes more precise.

Each item that the candidate receives is selected from a large pool of item using three criteria:

1. The item is limited to the content area that will produce the best match to the test plan percentages. It is ensured that each candidate's exam has enough questions from each content area to match the required test plan percentages.

2. An item is selected that the candidate is expected to find challenging. Based on the candidate’s answers up to that point and the difficulty of those items, the computer estimates the candidate’s ability and selects an item that the candidate should have a 50 percent chance of answering correctly. This way, the next item should not be too easy or too hard and the examination can get the maximum information about the candidate's ability from the item.

3. Any item that a repeat candidate has seen in the last year is excluded.

**Pretest Items**

For CAT to work, the difficulty of each item must be known in advance. The degree of difficulty is determined by administering the items as pretest items to a large sample of NCLEX candidates. Because the difficulty of these pretest items is not known in advance, these items are not included when estimating the candidate's ability or making pass-fail decisions. When enough responses are collected, the pretest items are statistically analyzed and calibrated. If the pretest items meet the NCLEX statistical standards, they can be administered in future examinations as scored items. There are 25 pretest items on every NCLEX-PN. It is impossible to distinguish operational items from pretest items, so candidates are asked to do their best on every item.

**Passing and Failing**

The decision as to whether a candidate passes or fails the NCLEX is governed by three different scenarios:

**Scenario 1: The 95% Confidence Interval Rule**

This scenario is the most common for NCLEX candidates. The computer will stop administering items when it is 95% certain that the candidate's ability is either clearly above or clearly below the passing standard.

**Scenario 2: Maximum-Length Exam**

Some candidate's ability levels will be very close to the passing standard. When this is the case, the computer continues to administer questions until the maximum number of items is reached. At this point, the computer disregards the 95% confidence rule and considers only the final ability estimate:

- If the final ability estimate is above the passing standard, the candidate passes.
- If the final ability estimate is at or below the passing standard, the candidate fails.

**Scenario 3: Run-Out-Of-Time Rule (R.O.O.T.)**

If a candidate runs out of time before reaching the maximum number of items and the computer has not determined with 95% certainty whether the candidate has passed or failed, an alternate criteria is used:

- If the candidate has not answered the minimum number of required items, the candidate automatically fails.
If at least the minimum number of required items were answered, the computer looks at the last 60 ability estimates.
  - If the last 60 ability estimates were consistently above the passing standard, the candidate passes.
  - If the candidate’s ability estimate drops below the passing standard even once over the last 60 items, the candidate fails.

This does not mean that the candidate must answer the last 60 items correctly. Each ability estimate is based upon all previous items answered.

**Scoring Items**
The majority of items in the NCLEX are multiple-choice, but there are other formats as well. Items are scored as either right or wrong. There is no partial credit. For updated information on the administration of the examination, please visit the NCSBN website at www.ncsbn.org.

**Types of Items**
During the administration of the NCLEX-PN, candidates will be required to respond to items in a variety of formats. These formats may include, but are not limited to: multiple choice, multiple response, fill-in-the-blank calculation, drag and drop/ordered response and/or hot spots. All item types may include multimedia, such as charts, tables, graphics, sound and video.

For more information, please visit the NCSBN website at www.ncsbn.org to review information about alternate item formats.

**NCLEX® Examination Terminology**

**Client:** Individual, family or group which includes significant others and population.

**Prescription:** Orders, interventions, remedies or treatments ordered or directed by an authorized primary health care provider.

**Primary Health Care Provider:** Member of the health care team (usually a medical physician [or other specialty, e.g., surgeon, nephrologist, etc.], nurse practitioner, etc.), licensed and authorized to formulate prescriptions on behalf of the client.

**Confidentiality**
Candidates should be aware and understand that the disclosure of any examination materials, including the nature or content of examination items, before, during or after the examination, is a violation of law. Violations of confidentiality and/or candidates’ rules can result in criminal prosecution of civil liability and/or disciplinary actions by the licensing agency, including the denial of licensure.
Tutorial
Each NCLEX-PN candidate is provided information on how to answer examination items. A tutorial is given at the beginning of the examination explaining the various formats that candidates may see on the examination. More information on alternate item formats is available on the NCSBN website at www.ncsbn.org. The following are examples of how screens in the tutorial may appear. Examples of possible item formats include:

Multiple Choice (One Answer)
Multiple Response

Practice Item Type #2: Multiple-Response Item

In this item type, you will be presented with a question and a list of options and asked to select all the options that apply.

Note how this item type differs from the single-response multiple-choice item you saw earlier. In this item type, the options are preceded by square boxes and you can check more than one box. In the previous item type, the options are circles and you can only select one option.

For the practice item below, the correct options are Apple and Banana (options 1 and 2). Please use your mouse to check Apple and Banana now. The check mark indicates that you have selected that response option. To deselect the response, click on the box again. The check mark will disappear, indicating that you have deselected that response.

Click Next to confirm your answer and move to the next practice item.

Which of the following are fruits? Select all that apply.

- [ ] 1. Apple
- [ ] 2. Banana
- [ ] 3. Cow
- [ ] 4. Dog
- [ ] 5. Elephant
Fill-in-the-Blank

Calculator

Practice Item Type #3: Fill-in-the-Blank Item

In this item type, you will be presented with a question and asked to calculate and type in your answer. Type only a number as your answer, including a decimal point if appropriate. To change your answer, use the backspace key to delete the number and type another number. You will only be able to type in numbers as your answer. If you try to type any other characters, you will be presented with a message box asking you to try again.

To use the calculator, click on the calculator button on the upper left-hand corner of the screen. To enter numbers in the calculator, you can use the mouse to click on the calculator’s buttons or use the number keypad on your keyboard. When you are finished with the calculator, you can close the calculator by clicking on the X in the top right corner of the calculator.

For the practice item below, first open the calculator. Second, compute a total weight by adding the weight of four pumpkins. Third, compute the average by dividing the total weight by the number of pumpkins (4). The division symbol is \( \div \). Your calculator should now read 3.775.

You do not have to type in the unit of measurement, “kilograms” in this example. If rounding is necessary, perform the rounding at the end of the calculation. Please type 3.8 as your answer.

Click Next to confirm your answer and move to the next practice item.

The weights of four pumpkins in kilograms are: 4.22, 4.15, 3.40, 3.33. What is the average (mean) of the pumpkins’ weight? Record your answer using one decimal place.

Answer: 3.8

kilograms
Hot Spot

Practice Item Type #4: Hot Spot Item

In this item type, you will be presented with a problem and a figure. You will be asked to use the mouse to select an area of the figure. To select an area, place the cursor on the area you want to select, then click on the left mouse button. An X will appear to show your answer. To deselect your answer, place the cursor on the X and click again. Your answer will be deselected. To change your answer, paint the cursor to another area and click.

For the practice item below, the correct answer is Box 1. Use the mouse to select Box 1.

Click Next to confirm your answer and move to the next practice item.

The following figure contains four boxes. Which box is in the upper left-hand corner?

Box 1  Box 2

Box 3  Box 4
Exhibit

The owner of a bakery would like to know which of the supplies is most expensive. Based upon receipts from the past month, which item was the most expensive? Click the exhibit button for additional information.

- O 1. baking trays
- O 2. storage bin
- O 3. flour
- O 4. pastry bags

Drag and Drop/Ordered Response

Practice Item Type #8: Drag and Drop/Ordered Response Item

In this item type, you will be presented with a problem and a list of options. You will be asked to place the options in a specified order, such as numerical, alphabetical or chronological.

The unordered options will appear in a box on the left side of your screen. To place the options in a new order, click on an option and drag it to the box on the right side of your screen. You may also highlight the option in the left-hand box and then click the right arrow key, →, to move the option. To rearrange the order of options once they have been placed in the right-hand box, select the option you would like to move and click the up, ↑, or down, ↓, arrow keys. You may also click an option and drag it to a new position within the right-hand box. To complete the item, you must move all options from the left-hand box to the right-hand box.

For the practice item below, you should move the list of months (by dragging or using the arrow button) to the right so that the list is in alphabetical order: April, February, January, June, March, May. That is, April should be at the top, and May should be at the bottom. If you do not have the months in this order, please re-arrange them now.

Click Next to confirm your answer and proceed.

The first six months of the year appear in a list below. Please arrange them in alphabetical order. All options must be used.

<table>
<thead>
<tr>

Practice Item Type #7: Audio Item

In this item type, you will be presented with an audio clip. You will need to listen to the audio clip and select the options that apply.

Place your headphones on now.

Click the play button below to listen to the audio clip.

You can adjust the volume by clicking and moving the slider.

Click the play button again to replay the audio clip.

For the practice item below, the correct option is Corn (option 2). Please use your mouse to select Corn now.

Click Next to confirm your answer and move to the next practice item.

Listen to the audio clip. The price is rising for which type of grain?

O 1. Wheat
   O 2. Corn
   O 3. Cows
   O 4. Beards
Graphic

Practice Item Type #: Graphic Item

In this item type, you will be presented with a question and options that are graphics instead of text. The options are preceded by circles so you can select only one option as your answer.

For the practice item below, the correct option is 1. Please use your mouse to select 1 now.

Click Next to confirm your answer and move to the next practice item.

Which road sign indicates a place where gas may be purchased?

1. 
2. 
3. 
4.
V. Item Writing Exercises

The following written exercises are designed to provide nurse educators with hands-on experience in writing NCLEX®-style test questions. Please note, not all item types are provided in the Item Writing Exercises. Refer to the NCSBN website, www.ncsbn.org, for additional information on alternate item formats.

NCSBN offers two online web-based courses in Assessment Strategies (Test Development and Item Writing, and Assessment of Critical Thinking) at www.learningext.com. Utilize these web-based courses as a means of supplementing knowledge of test writing principles and to encourage compliance with the NCLEX style of writing.

Steps to Item Writing

A well designed multiple-choice item consists of three main components: a stem (asks a question or poses a statement which requires completion), key (the correct answer/s) and distractor(s) (incorrect option/s). The following section is designed to enhance the writer’s understanding of the NCLEX item writing process. Steps are provided below to assist in creating a well-designed item.

Step 1. Select an area of the test plan for the focus of the item.

Step 2. Select a subcategory from the chosen area of the test plan.

Step 3. Select an important concept within that subcategory.

Step 4. Use the selected concept and write the stem.

Step 5. Write a key to represent important information the entry-level nurse should know.

Step 6. Identify common errors, misconceptions or irrelevant information.

Step 7. Use the previous information and write the distractors.

Step 8. Complete the item using the stem, key and distractors.

Example Using the Above Steps

Here is an example of how to write an item using the above steps.

1. **Select an area of the test plan for the focus of the item.**
   *Safety and Infection Control*

2. **Select a subcategory from the chosen area of the test plan.**
   *Standard Precautions/Transmission-Based Precautions/Surgical Asepsis*

3. **Select an important concept within that subcategory.**
   *Reinforce appropriate infection control procedures with client and staff members*
4. Use the selected concept and write the stem.

*The nurse and unlicensed assistive personnel (UAP) are caring for a client with vancomycin-resistant enterococci (VRE). Which of the following actions performed by the UAP would require immediate follow-up from the nurse?

5. Write a key to represent important information the entry-level nurse should know.

*Contact Isolation:
- Assisting the client to ambulate in the hallway

6. Identify common errors, misconceptions or irrelevant information.

*Lack of understanding of isolation precautions
*Uncertainty related to specific diagnosis

- Use the previous information and write the distractors.

*Leaving a blood pressure cuff in the client’s room to be used by the client only
*Putting on a protective gown to assist the client to sit in a chair
*Taking the gloves off before leaving the client’s room

- Complete the item using the stem, key and distractors.

The nurse and unlicensed assistive personnel (UAP) are caring for a client with vancomycin-resistant enterococci (VRE). Which of the following actions performed by the UAP would require immediate follow-up from the nurse?

a. Leaving a blood pressure cuff in the client’s room to be used by that client only.
b. Putting on a protective gown to assist the client to sit in a chair.
c. Taking the gloves off before leaving the client’s room.
d. Assisting the client to ambulate in the hallway. (key)
Exercises

Case scenarios: Use the steps listed above to create an item based on the following situations:

Coordinated Care

The charge nurse in a long term care facility is preparing client care task assignments for the oncoming shift. One of the staff members is an unlicensed assistive personnel (UAP). Write an item that has one task that the UAP could be assigned and three tasks that require a nurse.

Safety and Infection Control

A 76-year-old client is being discharged from the hospital to their adult child's home after a certain surgery. The nurse is reinforcing the discharge instructions with the client and the adult child. Write an item indicating that correct understanding of the instructions took place.

Health Promotion and Maintenance

The nurse at a local health fair is assisting with a cancer screening for a specific organ. Write an item (four to six options with at least one key) indicating risk factors for cancer of that organ.

Psychosocial Integrity

A nurse on an in-patient psychiatric unit observes a client pacing the hallway, mumbling and occasionally yelling aloud, “Stop it!” Write an item describing the action the nurse should take in this situation.

Basic Care and Comfort

The nurse in a long-term care facility is observing a newly licensed nurse care for a client with continuous tube feedings. Write an item describing an action that, if observed, would require the nurse to intervene immediately.

Pharmacological Therapies

The nurse is reinforcing discharge instructions for a client who is newly prescribed a certain medication. Write a multiple response item with foods or activities that this client should avoid while on this medication.

The nurse is caring for a client with a certain prescription. Write an item that names the medication, the amount and time frame that the client would receive the medication, the amount available, the client's weight in pounds and kilograms and how much of the medication the client should receive with each administration. The concept of the item should be that the candidate needs to perform a calculation in order to achieve the correct answer.

Reduction of Risk Potential

The nurse is caring for a client who had a procedure three hours ago. Write an item that includes observations the nurse would see in this client and which data should the nurse respond to first.

Physiological Adaptation

The nurse is collecting data from a client with a suspected certain disease. Write a multiple choice item of expected findings associated with this diagnosis.
VI. References

APPENDIX A

Case Scenario Answers/Examples

Coordinated Care
The charge nurse in a long-term care facility is planning client care task assignments. Which of the following tasks would be most appropriate to assign to an unlicensed assistive personnel (UAP)?

a. Placing a fan in the room of a client who was recently diagnosed with Graves’ disease (key)

b. Assessing a client with acute pancreatitis who is reporting greenish-yellow emesis and abdominal pain

c. Teaching a client who was recently diagnosed with diabetes mellitus (type 2) how to administer insulin

d. Providing discharge instructions to a client with Crohn’s disease who experienced diarrhea, weight loss and steatorrhea

Safety and Infection Control
The nurse is reinforcing teaching with the adult child of a client who had a hip replacement and is being discharged to the adult child’s home. Which of the following statements by the adult child would indicate a correct understanding of the teaching?

a. “I will assist my parent to perform full range-of-motion (ROM) exercises in both legs.”

b. “I will assist my parent to get in and out of the bathtub.”

c. “I will install raised toilet seats on every toilet in my home.” (key)

d. “I will keep my parent on bed-rest for the first five days after discharge.”

Health Maintenance and Promotion
The nurse is conducting a health screening at a local health fair. Which of the following should the nurse recognize as increasing the risk for developing testicular cancer? Select all that apply.

a. Vasectomy

b. Undescended testicles (key)

c. Exposure to the herpes simplex virus type 2 (HSV 2)

d. Family history of testicular cancer (key)

e. Multiple sexual partners

Psychosocial Integrity
The nurse is caring for a client who is mumbling, pacing in the hallway and occasionally yelling, “Stop it!” Which of the following actions should the nurse take?

a. Remove other clients from the area

b. Escort the client back to the client’s room

c. Request that the client be quiet and not disrupt others

d. Use distraction to refocus the client to reality (key)
Basic Care and Comfort

The nurse is observing a co-worker who is caring for a client who has prescribed continuous enteral tube feedings. Which of the following actions by the co-worker would require the nurse to intervene?

a. Elevating the head of the client's bed to 35 degrees
b. Measuring and then re-administering the residual gastric content
c. Changing the tube feeding container and tubing every eight hours (key)
d. Replacing the formula every four hours with fresh formula

Pharmacological Therapies
