GATORWIFI

GatorWiFi is quarterly Internet access for all your devices while you’re on campus. To access GatorWiFi, follow the instructions below.

For daily WiFi access, use Alternate Single Session Internet Access—see below.

How to Connect to GatorWiFi

1. On your wireless device, connect to the Green River Wireless network.
2. If your device doesn’t automatically bring up the authentication webpage, open an internet browser. Sometimes it’s helpful to connect to a website you don’t often visit, like CNN.com, to prompt the authentication webpage to pop up.
3. Click GatorWiFi Quarterly Internet Access (or Alternate Single Session for daily use).
4. Follow the prompts and enter your Network Login.
5. After signing in, download the Cloudpath client. Cloudpath will recognize your device whenever you are on campus and automatically connect you to GatorWiFi.
6. Follow the prompts to install Cloudpath. This may take a few moments.
7. After Cloudpath is successfully installed, you will be connected to the GatorWiFi network.
